A social worker for the Mississippi State Department of Public Welfare today was named one of 100 National winners in the Pillsbury Bake-Off contest. Miss Favre is the only Baker-Off finalist from Mississippi this year.

She is Udell L. Favre, 200 Felicity St., Bay St. Louis, who will go to Miami Beach to compete with other prize-winning bakers from throughout the United States in the "Grand Ballroom of the Americas Hotel. The Grand Prize in the \$100,000 contest is \$25,000.

Miss Favre is the only Baker-Off finalist from Mississippi this year. As a finalist, she is already the winner of a General Electric range and mixer, a \$100 cash prize and full expense money for the trip to Miami Beach.

Miss Favre won a place in the finals with a recipe for an apple dessert. The recipe was submitted for judging on a nationwide basis earlier this year.

This prize-winning recipe was developed by Miss Favre from one that had been in the family. She modernized it with a number of changes - adding sugar, melted butter and flavoring to the batter, and finishing with a crunchy topping and lemon sauce.

It also fits present-day demands for convenience, according to Miss Favre, since the dessert freezes well in advance of serving.

Miss Favre is a graduate of St. Joseph Academy, Bay St. Louis, and attended Southeastern Louisiana and Tulane University, where she majored in journalism.

Although her career in social work keeps her on the go, Miss Favre finds time to bake weekly. She especially enjoys making rolls and desserts, and draws from a collection of 65 cookbooks.

She is associated with the American Public Welfare Association and the Mentally Retarded Association. Her hobbies, in addition to baking, include sewing, the crafts and bowling.

Should she win the Grand Prize in the Bake-Off, Miss Favre would use the money to return to college to get her degree. She also would like to attend a cake-decorating school.

A NEW ROAD

"Let's find a new road!" That's a game we play often when we take a family ride.

These little journeys of discovery have led us to some beautiful, serene sections of our community that we never would have seen if we'd stayed on the busy highway.

At times, life itself can seem like a crowded, noisy highway. The years rush by... we promise ourselves that some day we'll take the time to look around us and try to understand where we are and why... but worldly interests tend to fill every minute to the brim. We wonder why the pleasures that we work so hard to obtain fail to bring us happiness... and we sense that life has a deeper meaning, if we could find it.

The Church can guide you and your family to a new, wonderful road. Discover the warm fellowship, the renewed courage, the refreshing peace of mind that grow from membership in your neighborhood church.

FEDDERS

HIGHLY RECOMMENDS - WILCOX ELECTRIC
AND APPLIANCE COMPANY
FOR THE SALES AND SERVICE OF FEDDERS
WINDOW AIR-CONDITION UNITS

What every
Southerner should
know about air
conditioners...

First—when the weather bureau says its 90°—they mean 80 in the shade. Out where your air conditioner is operating it may be 20 to 25° hotter. This is where the ordinary air conditioners stop cooling to prevent their over-heating.

But, FEDDERS is stubborn. They build air conditioners to keep you cool when its 115°! Just one reason why FEDDERS cool rooms faster, keeps 'em that way!

FEDDERS is as precisely engineered as a fine watch, but as rugged as a Sherman Tank. Nothing tops 'em when there's a cooling job to be done.

BUT MOST IMPORTANT—Only FEDDERS COOLS the air. Just before it gets to you. Other air conditioners pull air through the coils, then through the hot fan to you. Thanks to reason they have to work harder to get the job done. But instead of pulling the air through the COOLING COILS to you, they just waste cooling power for the same amount of work. About this—FEDDERS.

No wonder FEDDERS is first in the South. Largest selling air conditioner for 11 straight years.

What's your take on this? The best air conditioner for the money? It's not an ordinary one. Make sure its name is FEDDERS.

NASA News..

HUNTSVILLE, ALA. - The NASA Marshall Space Flight Center has awarded a contract to the Pratt & Whitney Division of United Aircraft Corp. for development of a high pressure liquid hydrogen pump.

The pump is to be adaptable for use on advanced, high pressure rocket engines burning liquid oxygen and liquid hydrogen propellants. Such a pump would be a vital element of high pressure combustion systems now under investigation.

The contract, in the amount of \$785,394, calls for delivery of a "breadboard" model by June 19, 1965. (A breadboard model contains all components although they are not packaged in final form.)

Current plans are for the pump to be applicable for use on hydrogen/oxygen engines which have combustion chamber pressures of up to about 5,000 psi.

APPROVE ACTION IN SERIOUS ASIAN SITUATION

(By Senator John Stennis)
WASHINGTON - The situation that has developed in Southeast Asia is deadly serious. The Senate has adopted a resolution approving United States determination to take all necessary measures to prevent aggression and to repel any armed attack against our forces in international waters.

For years, I have advocated that the United States take a firmer, harder line in its dealings with other nations and in the general conduct of its foreign affairs with would-be enemies or aggressors. We have responded to the willful, deliberate and unprovoked communist attacks on our ships with a firm, swift and strong response. We have hit them a severe blow. This resolution merely says we will hit them again if we are attacked.

I believe this firm course may be our last and our only chance to avoid what could quickly develop into a full-scale war. This resolution shows our unity as well as our determination. It also shows that no one has a chance to attack us without paying a heavy price.

The situation is serious, but it will become far worse if we show the slightest weakness or hesitation. If we must have a show-down, let it be with Red China. None of us are happy about our situation in Vietnam and about our position there. But that bridge has long since been crossed. We are already there. It is not a question of becoming involved in Vietnam and Southeast Asia. We are already involved.

**COLMER AIDS
CATTLEMEN**
WASHINGTON D. C. - Congressman Wm. M. Colmer (D-Miss.) said that he plans to call up a resolution from the Rules Committee early next week which would make in order the quick adoption of a Senate passed amendment to a House Bill providing quotas limiting the amount of foreign meat which is now coming into this country.

The President is opposed to the bill, and the Administration leaders are attempting to kill it. But the Mississippi Rules Committee member said, "While we may decide on a different course from the Senate Bill, I am working with the cattle people and wish to be guided by their wishes in the matter."

GA. Pulp and paper mills and pulpwood are responsible for the loss of more than 270,000 acres in the South during the 1963-64 planting season. In a report by the South Forestry Conservation, Mr. Strey, general manager of the South Forestry Conservation, explained that the loss was part of the industry's plan to reforest the land into productive forest. The 27 million trees in individual landowners' plantations were lost.

Strey said that the loss was approximately 15 percent of the total forest in the South during the 1963-64 season. He said, "The loss in the area was not in pines, showing a loss over the 53,402 acres."
